All Vista drivers for TV tuner cards do not support the Media Center application in Vista which requires that the input from the card drivers to VISTA be encoded in MPEG format.. And you'll be unable to run the best Mac applications and Windows apps side by side considering the software requires disk partitioning.

The encoding is performed by a hardware MPEG2 encoder chip on the tuner card so if your card specifications do not state that the card has this capability and or do not state that the card is not also supported with MCE2005 compatible drivers you will not be able to use it with MC.. The Vista tuner drivers that do not support Media Center run on any version of Vista and are for use with a TV application provided by the card manufacturer or by other TV applications that do require MPEG2 encoded video.
